Research Collaborative in  
Quality and Patient Safety

HSE • HRB • RCPI

## Join our Quality and Patient Safety Database

### RCQPS is recruiting researchers for potential Quality and Patient Safety research

The Research Collaborative in Quality and Patient Safety:

- Is a joint Health Services Executive, Health Research Board, and Royal College of Physicians of Ireland initiative.
- Brings together researchers with clinicians to answer questions to improve patient safety.
- Aims to identify the most pressing issues affecting healthcare quality and patient safety in Ireland
- Allocates funding for research into these issues to drive improvements in quality and patient safety throughout the entire health system.
- Has €1.1 Million for RCQPS prioritised projects over the next two years with up to €280,000 available per project.

The following healthcare issues have been prioritised for research:

- Healthcare efficiency
- Evaluation of quality improvements
- Patient experiences
- Interventions
- Prevention

We are looking for researchers from a broad range of research disciplines including, but not limited to:

- Action Research
- Analytics
- Ethnography
- Evaluation
- Human Factors
- Mixed Methods Research
- Qualitative research

**To be eligible for consideration for this funding cycle register your interest by the 28/03/2017**
