

Poem

COVID-19: Welcome to the Vaccine

After a long wait...
in trouble and strait...
after all the times...,
pressing and tight...,
and the long path...
in the big plight...,
comes as good news..
a vaccine on the way...,
will be soon in use...
Let joy be released..,
and blessings perfuse..
Remember our loved ones
Let their souls rest..
now.. in repose...
and all who are alive...
defend their health cause..
What a big relief..!
Forgive my disbelief..!
Be just and fair.....
Administer it to everyone...
vulnerable and at the risk..
Knock at every door....
Remember all the poor....
from every tongue..

What could be done...
in years and years...,
now in twelve months..!
Now is the time to live ...
in peace... with no fears..
Yet, keep up to the task...
Do not throw the mask..!
