

### **Walk beside me (Poem)**

Walk beside me...  
In the valley of my mission....in my profession...  
That I may reflect... the beauty of your radiance...  
And the perfect image.. of your brilliance..!  
Upon the lives of all patients...  
In whatever role or position..  
*...Walk beside me...*

In those ascending waves... of their pains and suffering...  
That I may bring to them your message of love...  
Unfathomable, unfailing and not diminishing..!  
To gently answer their hearts questioning...  
Who can offer us a sense of closure .....

And bring the sufferings to attrition....?  
That they may witness..... an end to pains in full remission..  
*....Walk beside me...*

That your rod and royal staff....  
may comfort patients and the staff..  
Ailments of patients are a sinking sand...  
Let them see in me.... their helping hand..  
Grant me a heart tuned to yours..  
To support my patients... and open doors...  
That they may conquer illness...  
And fight despair....  
By the power of hope you only give...  
That no one else can compare.....  
*...Walk beside me....*

I am your vessel to honour you..  
As I walk in the medical ward....  
Among the sick and all the frail...  
To feed their hunger to a beautiful word...  
To quench their thirst when on their own...  
For man can't live by bread alone..!
