

In the Garden of Values - Penetrative Medicines

Z. Barsoum.

South West Acute Hospital, Enniskillen, Co. Fermanagh, NI.

You let me into...
Your garden of values...
The fragrance of air...
Your patience in care...
You show to your patients...
In thoughtful reflection...
Something to share....
In the garden of values...
The fruits are all there....
Look into yourself....
Be just and be fair...
The virtues you need...
Your minds remember...
And hearts shall bear...
Faith is your armour...
Your refuge and shield...
You need it indeed...
The crown of all values...
Reflecting your acts...
What a great deed..!
In the garden of values...
Show love to your patients...
And also to all...

The core of all virtues...
Your patients shall see it...
In your practice and role...
....Remember them all...
... Four values for you...
...Adorning your face...
...Patience and love...
...And Fairness and Faith...
...Administering your medicines...
....By mouth or injection....
... Or by intubation...
...To give lung insufflation...
...Or by infusion....
... Administer them all...
...They come in one unity...
... In a single ampoule..!
....In perfect fusion...
...These also are medicines...
... Keep their peri-organ effusion...!
...This is now not an ailment...
...But a healing diffusion...!
