

Exceptional Leasing opportunity (Primary care centre) – West Galway City

Premises have recently become available that were formally an established, vibrant primary care centre for over 20years, in an affluent area with significant population growth just outside Galway City.

The former GP practice has now totally moved out of this area. There is extremely strong local support to re-establish a primary care service from this site .The overwhelming majority of the patient population base live locally to this urban surgery and are anxious to have their local surgery re-opened and GP services to be restored there.

There are exceptional leasing terms and conditions available to the right person willing to re establish a Primary care service at this site that already has a purpose built premises and a local practice population base.
