Medical Education and Training: The Old Ways and Modernity	907
Original Papers	
<p>Same-Day-Discharge vs Next-Day-Discharge after Percutaneous Coronary Intervention</p> <p>Bruno and Sharif describe a study of 97 patients who had a percutaneous coronary intervention. They found that same-day discharge was safe in selected cases if there are no complications in the first 6 hours after the procedure.</p>	908
<p>The effects of a range of treatment modalities on pain symptoms and overall health in women attending an endometriosis clinic</p> <p>Treacy et al. studied 162 women with endometriosis. Following the use of a range of interventions at the clinic, the patients reported a reduction in pain symptoms.</p>	909
<p>Frostbite injuries from recreational nitrous oxide use</p> <p>Murphy et al. describe 7 cases of frostbite injury following recreational use of nitrous oxide. The injury is due to the spillage of the liquified gas on the skin.</p>	910
<p>Barriers and enablers to prenatal population screening for critical congenital cardiac disease</p> <p>Cody et al. report that in 2021, 18/19 maternity units offered a mid-trimester scan, and 17/19 units provided a first-trimester scan. The authors state that the services would be improved by the introduction of critical congenital heart disease screening.</p>	911
<p>Effect of the Covid-19 pandemic on breast cancer presentation - a single unit study over 5 years</p> <p>Butt et al. analysed all cases of breast cancer between 2017 and 2021. The yearly number of cases was higher in the pandemic, 378 vs 332 per year. There were also higher rates of locally advanced and fungating disease.</p>	912

<p>Trends in Paediatric Emergency Medical Presentations</p> <p>Baky et al. describe the annual attendance numbers in a large paediatric ED department during the period 2017-2022. There was a significant decrease in 2019-2020 and a subsequent increase in 2021. Among the sub-categories, there was an increase in mental health problems.</p>	913
<p>A Video Analysis of Helmet Area Injuries and Helmet Type Worn in Hurling and Camogie Over 2 Seasons</p> <p>Nolan et al. report that there were 129 potential hurling injuries across 56 games, 86% involved a non-standard helmet. There were 7 potential camogie injuries and 43% involved non-standard helmets. The authors urge the GAA to enforce the use of standard helmets.</p>	914
<p>Short Reports</p>	
<p>Gender disparities in oral anticoagulants</p> <p>McErlean et al. report on a series of patients with atrial fibrillation who were on anticoagulants. Male patients were more likely to be on the correct dose compared with female patients.</p>	915
<p>Case Reports</p>	
<p>Liposarcomas Don't Rest, They Recur!</p> <p>Al Nafisse et al. describe the recurrence of a liposarcoma on the posterior pharyngeal wall of a 65 year old male patient.</p>	916
<p>Anti-NMDA receptor encephalitis presenting as aseptic meningitis</p> <p>Joyce et al. present a case of anti-NMDA frontal lobe syndrome that initially presented as aseptic meningitis. There was a good response to IV methylprednisolone and immunoglobulins.</p>	917
<p>Gallbladder rupture following blunt trauma</p> <p>Rana et al. describe a 34 year old woman who sustained a ruptured gall-bladder while dancing with her husband. Both fell with the man falling on top of her. She required an open cholecystectomy.</p>	918
