Reducing Preterm Birth and its Risks	1
Original Papers	
<p>Prevalence and severity of menopausal symptoms in peri and post-menopausal women</p> <p>Heavey et al. report that there was high rate of menopausal symptoms in the study group with over 80% being affected. In addition to the usual symptoms, poor sleeping was also commonly reported.</p>	2
<p>Utilising Digital Ocular Imaging for Paediatric Retinal Haemorrhages</p> <p>Al Zaabi et al. describe the use of RetCam imaging in the investigation of retinal haemorrhages in 26 children.</p>	3
<p>Consequences of the Crisis in Social Care for Older Hospital Inpatients with Frailty</p> <p>Ahmed et al. report on the risk of hospital associated complications (HAC) in older patients waiting discharge home. For every additional day of waiting the HAC increases 4%.</p>	4
<p>Assessment of increased General Practitioner access to diagnostic imaging</p> <p>O'Doherty et al. have surveyed GP's opinions on access to diagnostic imaging. The responses were positive including improved efficiency and better patient satisfaction.</p>	5
<p>A model three hospital's compliance with guidelines for hip fractures</p> <p>Shaji et al. report a series of 100 patients with hip fractures over an 8 month period. In 32% of cases the surgery didn't take place within 36 hours. The mean LOS was 14.8 days.</p>	6

<p>Optimising Post-Operative Imaging in Hemiarthroplasty</p> <p>Azeem et al. describe a large series of 1115 cases hemiarthroplasty for hip fractures. The complication rate was minimal 1.8%. They outline their imaging regimen.</p>	7
Short Reports	
<p>Potential of national/regional datasets to support targeted service planning</p> <p>Hayes et al. have surveyed national/regional health data sets. They found that there are gaps in variables that could enable health care planning.</p>	8
Case Reports	
<p>IgG 4 -related hypophysitis leading to diabetes insipidus</p> <p>Khan et al. report a case of the increasingly recognised condition IgG4 in which the patient in addition to pancreatitis also developed diabetes insipidus.</p>	9
<p>A very frightening but not dangerous rash in children</p> <p>Ly-Liu et al. present a case of urticaria multiforme in a child.</p>	10
<p>Unusual Presentation of Confusion: Hyperammonaemic Hepatic Encephalopathy Due to Intrahepatic Portosystemic Venous Shunt</p> <p>Yousif et al. describe a case of hepatic encephalopathy secondary due to a porto-systemic venous shunt.</p>	11
Letters to the Editor	
<p>Potential impact of pembrolizumab in the adjuvant setting for intermediate-high risk and high risk kidney cancer</p>	12
<p>Opportunistic Measles Immunisation within the Paediatric Inclusion Health Service</p>	13
