Nursing and Medical Staff Turnover Rates and Patient Outcomes	33
<b>Occasional Pieces</b>	
Navigating the Tension Between Collective Leadership and the Legal Accountability of the Named Consultant in Healthcare	34
<b>Original Papers</b>	
<p>Echocardiography Training Pathway for Intensive Care Trainees: A Comparison with International Guidelines</p> <p>Boyd et al. address the issue of echocardiography training for ICU trainees. A certified training programme should be available.</p>	35
<p>Tranexamic Acid Use in Neurosurgery and Spinal Surgery</p> <p>Hui Ng and Moore found that Tranexamic acid was administered in only 43 of 212 neurosurgery and spinal surgery cases. The authors discuss the low use of TXA despite its potential benefits in reducing intraoperative bleeding.</p>	36
<p>Skin of Colour Dermatology: A national study on the confidence of Irish primary care providers</p> <p>Herlihy et al. surveyed 121 GPs about dermatological problems in patients with skin of colour. Almost two-thirds were not confident in the management of these cases.</p>	37
<p>Antenatal venous thromboembolism and the performance of risk assessment tools</p> <p>Milne et al. reviewed 63 women with antenatal VTE. They found that the use of a risk assessment tool would not have identified the majority of cases.</p>	38
<p>Halting the progression of chronic kidney disease: an audit of the use of RAASi and SGLT2i</p> <p>Teh et al. discuss the medication options in a series of 165 patients with chronic renal disease.</p>	39

<p><b>Serum drops for ocular surface disease: a national perspective</b></p> <p>Harford et al. report on the use of serum eye drops in a series of 102 patients. The commonest indication was refractory dry eye disease.</p>	40
<p><b>Intra-temporal and intracranial radiological abnormalities in cochlear implantation</b></p> <p>Farrell et al. report that among 898 cochlear implant cases there were 90 (10%) patients with cochlear radiological abnormalities, the most common being incomplete partition type 2 and an enlarged lymphatic sac.</p>	41
<b>Short Reports</b>	
<p><b>Evaluation of a newly introduced parenting support programme for families of children with 22q11.2 Deletion Syndrome</b></p> <p>Khan et al. describe an 8-week parenting programme for the management of the behavioural problems in children with 22q11.2 deletion.</p>	42
<b>Case Reports</b>	
<p><b>Diphtheria in a congregate setting — facilitators and barriers to an effective Public Health response</b></p> <p>Peterson et al. describe the management and isolation of a suspected case of diphtheria in an IPAS (international protection accommodation center). Measures included the vaccination of the other residents.</p>	43
<p><b>Concurrent infectious uvulitis and peritonsillar abscess in an adult patient</b></p> <p>Metri et al. report the acute ENT management of a swollen infected uvula which required needle aspiration of 4 mls of pus, dexamethasone, antibiotics, and nebulised adrenaline.</p>	44
<p><b>Anaesthetic Management of a patient with Rubinstein Taybi Syndrome</b></p> <p>Butt et al. point out that children with Rubinstein-Taybi syndrome are a greater anaesthetic risk because of obstructive sleep apnoea. Preoperative evaluation is important with measures in place in the event of a difficult airway.</p>	45

Parvimonas Micra resulting in Hepatic Abscesses Narayanan et al. report a case of multiple liver abscesses in a young man due to <i>Parvimonas Micra</i> . The authors point out the association with periodontitis and emphasise the importance of good dental hygiene.	46
<b>Letters to the Editor</b>	
Burden of Atopy: Atopic dermatitis documentation in a specialised asthma clinic	47
Inpatient serum amylase testing post-ERCP	48
POCUS in the Community Setting: a valuable tool in the assessment of dyspnoea	49
